

Monthly Indicators

July 2023

Percent changes calculated using year-over-year comparisons.

New Listings were down 15.1 percent for single family homes and 42.9 percent for townhouse-condo properties. Pending Sales decreased 7.5 percent for single family homes but increased 14.3 percent for townhouse-condo properties.

The Median Sales Price was up 24.6 percent to \$828,500 for single family homes but decreased 7.5 percent to \$502,000 for townhouse-condo properties. Days on Market increased 23.5 percent for single family homes and 110.5 percent for townhouse-condo properties.

Despite a drop in existing-home sales, home prices have remained near record highs, with a national median sales price of \$410,200 as of last measure, 0.9% below the all-time high of \$413,800 recorded in June 2022, according to NAR. With only 3.1 months' supply heading into July, the lack of inventory has boosted competition among buyers and put upward pressure on sales prices, especially in more affordable markets, where competition for homes remains particularly strong.

| All Price Ranges | 406 | 348 | -14.3% | 181 | 125 | -30.9% |

There are no year-to-date figures for inventory because it is simply a snapshot frozen in time at the end of each month. It does not add up over a period of months.

Glossary of Terms

A research tool provided by the Colorado Association of REALTORS®

| | |
|---------------------------------------|---|
| New Listings | A measure of how much new supply is coming onto the market from sellers. |
| Pending Sales | A count of all the listings that went into Pending status during the reported period. Pending listings are counted at the end of the reported period. Each listing can only be counted one time. If a listing goes into Pending, out of Pending, then back into Pending all in one reported period, this listing would only be counted once. This is the most real-time measure possible for home buyer activity, as it measures signed contracts on sales rather than the actual closed sale. As such, it is called a "leading indicator" of buyer demand. |
| Sold Listings | A measure of home sales that were closed to completion during the report period. |
| Median Sales Price | A measure of home values in a market area where 50% of activity was higher and 50% was lower than this price point. |
| Average Sales Price | A sum of all home sales prices divided by total number of sales. |
| Percent of List Price Received | A mathematical calculation of the percent difference from last list price and sold price for those listings sold in the reported period. |
| Days on Market Until Sale | A measure of how long it takes homes to sell, on average. |
| Housing Affordability Index | A measure of how affordable a region's housing is to its consumers. A higher number means greater affordability. The index is based on interest rates, median sales price and median income by county. |
| Inventory of Active Listings | A measure of the number of homes available for sale at a given time. The availability of homes for sale has a big effect on supply-demand dynamics and home prices. |
| Months Supply of Inventory | A measure of how balanced the market is between buyers and sellers. It is expressed as the number of months it would hypothetically take to sell through all the available homes for sale, given current levels of home sales. A balanced market ranges from 4 to 7 months of supply. A buyer's market has a higher number, reflecting fewer buyers relative to homes for sale. A seller's market has a lower number, reflecting more buyers relative to homes for sale. |
